Rami YOUNES

COBOL / Mainframe z/OS Analyst Developer

ramiyounes.dev@gmail.com | +33 6 46 28 07 02 | Strasbourg
ramiyounes-dev | ramiyounes-dev | ramiyounes.dev | French / Lebanese | Driving licence

Languages: French (bilingual) · English (bilingual) · Arabic (native) · German (beginner, A1)

*Software engineer transitioning into **COBOL Mainframe** development: intensive z/OS training (COBOL, JCL, CICS, DB2, VSAM, Pacbase) combined with 4 years of experience in software engineering, large-scale data processing, and full-stack development. PhD in Computer Science.*

Personal Projects

French Payroll & Employer Tax System — 2025–2026

Portfolio Project — DEMO

- **Batch payroll (6 COBOL programs):** Pay slips for 80 employees — base salary, overtime (TEPA law exemption), employee/employer contributions (PMSS T1/T2 brackets), withholding tax (2024 neutral rate schedule), COMP-3 packed decimal.
- **PCG accounting & .NET 8 export:** Balanced journal entries (accounts 421, 431, 437, 4421, 512, 641x, 645x) with overtime (6412) and absence deduction entries. .NET 8 COMP-3 decoder parsing COBOL flat files, static HTML5 showcase dashboard.

Environment: GNU COBOL, C#/.NET 8, COMP-3 Packed Decimal, Copybooks, Python, HTML5/CSS3/JavaScript

Mainframe Banking Transaction System — 2025–2026

Portfolio Project — DEMO

- **Batch processing (7 COBOL programs):** Three-phase lifecycle (PENDING → SORTED → COMMITTED) — SORT verb for batch ordering, appareillage for balance updates, COMP-3 packed decimal.
- **File organisation & dashboard:** Indexed (KSDS) and sequential (ESDS) files, copybook record layouts, ALERT flagging. Flask layer calling COBOL via subprocess, IBM 3270 terminal-style UI.

Environment: GNU COBOL, Python/Flask, Indexed & Sequential File I/O, COMP-3 Packed Decimal, Copybooks, HTML5/CSS3/JavaScript

Professional Experience

Analyst Developer — Apr. 2026–Present

Euro-Information: Accounting domain (Sector 7), Crédit Mutuel Alliance Fédérale | Strasbourg, France

- Develop COBOL programs and batch processing on IBM z/OS for accounting applications
- Build and maintain C#/.NET web applications and internal tools used across the group
- Corrective and evolutionary maintenance, adapting applications to new banking and accounting regulations
- Bug fixing and continuous improvement of existing systems
- Contribute to migrating applications to the group's private cloud (Docker, Podman, JFrog, Git)

Environment: COBOL, JCL, z/OS, TSO/ISPF, IBM Developer for z/OS (RDz), C#, .NET, Visual Studio, Git, Docker, Podman, JFrog

Training — COBOL Mainframe Developer — Jul.–Oct. 2025

AJC — Commercial Management System on z/OS | Remote

- **Product Repository Integration (Batch)**
  - CSV decoding, label normalisation, multi-currency conversion via VSAM KSDS exchange rates. DB2 insertion with SQLCODE control. Unit-tested conversion sub-program — 0 defects.
- **Sales Consolidation — Multi-source Matching (Batch)**
  - Synchronised double-read matching (multi-feed), order-break management. DB2 creation, queries and updates — zero discrepancy.
- **Invoice Generation (Batch / Reporting)**
  - Two-pass architecture: DB2 cursor export → sequential file → COBOL formatting program. VAT/commission parameterised via SYSIN.
- **CICS Transactional Interface (Online)**
  - Two chained transactions: VSAM KSDS authentication with lock + document entry with validation. Full BMS configuration — 0 defects.

Environment: z/OS, COBOL 85, JCL, DB2 (cursors, BIND, Plan/Package), VSAM KSDS (IDCAMS), CICS BMS, TSO/ISPF, SPUFI, File Manager, Eclipse RDz

Methodology: V-Model — Specifications, Design, Unit / Integration / Non-Regression / Acceptance Tests

Research & Development Engineer — 2020 – 2024

GIPSA-lab | LIG — Grenoble INP / CNRS | Grenoble, France

- **ETL & Data Processing:** Python, R and SQL pipelines on multi-GB multimodal corpora (audio, video, sensors).
- **Real-Time Systems:** C++ and Java algorithms for robotics/HRI. Profiling, benchmarking, memory optimisation.
- **Back-end & Integration:** Node.js REST services, PostgreSQL, MySQL, MongoDB, API design.
- **Quality:** Test plans, code reviews, peer-reviewed scientific publications.

Environment: Python, R, C++, Java, Node.js, PostgreSQL, MySQL, MongoDB, Prolog, Git, CI/CD, Linux, Docker

Teaching Assistant — 200 hours — 2020 – 2024

ENSIMAG — Grenoble INP / Université Grenoble Alpes | Grenoble, France

- Tutorials and lab sessions in algorithms, programming (C, Python, Java) and system architectures. Marking, student support, exam preparation.

Education

Mainframe / Large Systems Developer — Jul.–Oct. 2025
AJC Formation — COBOL, JCL, VSAM, CICS, DB2/SQL, Pacbase RPP/RTC, Eclipse RDz, TSO/ISPF. Jury presentation.

PhD in Computer Science & Robotics — 2020–2024
Université Grenoble Alpes (GIPSA-lab / LIG) — AI, Human-Robot Interaction, large-scale data processing.

Master's in Theoretical Computer Science — 2018–2020
Université de Montpellier

Bachelor's in Computer Science — 2015–2018
Lebanese University
