Rami YOUNES

Developer

rami.r.younes@gmail.com | +961 79 49 40 75 | Zalka, Lebanon
ramiyounes-dev | Nationality : Lebanese/French | ramiyounes.dev

Experience in front-end, back-end, data management, cloud technologies, and training in large systems – mainframe.

TECH STACK

Python | Java | C++ | WEB | PHP | XML/JSON/YAML | JS | C# | SQL | noSQL | MongoDB | Redis | Docker | Kubernetes

MacOS | Linux | Office | MS Windows | LaTeX | Git | CI/CD

Mainframe & Legacy systems

COBOL | JCL | TSO/ISPF | VSAM | CICS | DB2 | Algorithmie | Batch | transactionnel | Eclipse RDZ | Pacbase | z/OS

LANGUAGES

English: Bilingual
French: Bilingual
Arabic: Native language

SOFT SKILLS

- Autonomy
- Stress management
- Adaptability
- Teamwork
- Time management
- Organization

PROFESSIONAL EXPERIENCE

Research Engineer | Gipsa-lab | LIG | 2020 – 2024 | Grenoble, France

Real-time Simulation & Robotics: Development and testing of robotic simulations using **ROS, MoveIt, RViz**, performance optimization using **c++, java**, python

Data Processing & Visualization: Analysis of large datasets with **Python, R** and creation of visualization tools

Full-stack Development: Front-end interfaces (**Next.js, Three.js**) and back-end systems (**Node.js**), **PostgreSQL/MySQL** integration, API management

Containerization: Deployment using **Docker** to ensure scalability and reproducibility

Logic Programming & AI: Rule-based models and reasoning systems with **Prolog** for **automated planning**

Collaboration & Technical Writing: Publications, presentations, and teamwork in multidisciplinary environments

In parallel, over 200 hours of teaching assignments at ENSIMAG, UGA — one of the top-ranked schools in computer science and engineering in France |

EDUCATION

- Large Systems | Mainframe | Training | July 2025 – October 2025
- PhD in Computer Science and Robotics | Univ. Grenoble Alpes | 2020 – 2024
- Master's in Theoretical Computer Science | Univ. Montpellier | 2018 – 2020
- Bachelor's in Computer Science | Lebanese University | 2015 – 2018

SKILLS

- **Project Management:** Planning, monitoring, prioritization, and meeting deadlines in complex environments
- **Methodologies:** Agile/Scrum, object-oriented design, UML modeling
- **Analysis & Problem Solving:** Structured approach, analytical thinking, performance optimization
- **Communication:** Technical communication for diverse audiences, scientific writing, presentations
