Rami YOUNES

COBOL Mainframe Developer & Software Engineer

rami.r.younes@gmail.com | +33 6 46 28 07 02 | Grenoble, France
ramiyounes-dev | Nationality: Lebanese/French | ramiyounes.dev

*Engineer transitioning into **COBOL Mainframe development**: intensive z/OS training (COBOL, JCL, CICS, DB2, VSAM) combined with 4 years of software engineering experience in large-scale data processing and full-stack development. PhD in Computer Science. Bilingual EN/FR.*

TECH STACK

Mainframe & Legacy Systems

COBOL | JCL | TSO/ISPF | VSAM | CICS | DB2 | z/OS | Eclipse RDZ | Pacbase | Batch | transactional | Algorithms

Development

Python | Java | C++ | SQL | noSQL | JS | PHP | C# | XML/JSON/YAML | MongoDB | Redis

Tools & Infra

Docker | Kubernetes | Git | CI | Linux | MacOS | MS Windows | LaTeX

LANGUAGES

English: Bilingual
French: Bilingual
Arabic: Native

SOFT SKILLS

- Rigour & reliability
- Complex systems analysis
- Autonomy
- Fast adaptability
- Team collaboration
- Technical writing

PROFESSIONAL EXPERIENCE

Research Engineer | Gipsa-lab | LIG | 2020 – 2024 | Grenoble, France

- **Large-scale data processing:** Designed analysis and data processing pipelines with **Python, R, SQL** — logic directly transferable to **mainframe batch** processing
- **Performance-driven development:** Optimised real-time systems with **C++, Java, python**; advanced algorithmics for high-constraint environments
- **Back-end systems & integration:** Built **Node.js** services, integrated **PostgreSQL/MySQL**, managed APIs — skills transferable to **CICS/DB2** integration
- **Logic programming:** Modelled business rules and reasoning systems with **Prolog** — complementary to **COBOL**'s procedural paradigm
- **Containerisation & deployment:** Production deployments with **Docker/Kubernetes**; strong awareness of reliability and availability requirements for critical systems
- **Simulation & Robotics:** Real-time development with **ROS, MoveIt, RViz**; testing, debugging and documentation of complex systems
- **Collaboration & technical writing:** Scientific publications, presentations and international multidisciplinary teamwork

Lecturer — 200+ hours | ENSIMAG – Grenoble INP / UGA | 2020 – 2024 | Grenoble, France

- Taught algorithmics, programming and systems at one of France's top-ranked computer science and engineering schools

EDUCATION

- **Mainframe | Legacy Systems Training** | July – October 2025
  COBOL, JCL, CICS, DB2, VSAM, z/OS, Eclipse RDZ, Pacbase
- PhD in Computer Science & Robotics | Univ. Grenoble Alpes | 2020 – 2024
- MSc in Theoretical Computer Science | Univ. Montpellier | 2018 – 2020
- BSc in Computer Science | Lebanese University | 2015 – 2018

SKILLS

- **Project management:** Planning, tracking and meeting deadlines in complex environments
- **Methodologies:** Agile/Scrum, object-oriented design, UML modelling
- **Analysis & problem-solving:** Structured approach, analytical thinking, performance optimisation
- **Communication:** Technical writing for varied audiences, scientific publications, presentations
